

LedgeWall™ Plus Climbing Panels

The LedgeWall panel system is based on a unique climbing surface that is carved into the 3/4" all-wood panel to provide a rock-like, permanent and attractive climbing surface. Plus panels are pre framed for mounting on concrete and are sold in 4x8 sheets. The waterproof material is coated in a tough water-based coating. Each 4x8 panel comes pre-mounted with premium tee-nuts. See LedgeWall Standard panels for mounting on existing framing.
