

LedgeWall™ Climbing Panels

The LedgeWall panel system is based on a unique climbing surface that is carved into the 3/4" all-wood panel to provide a rock-like, permanent and attractive climbing surface. Standard panels are sold in 4x8 sheets or custom sizes. The premium waterproof material is coated in a tough water-based coating. Each 4x8 panel comes pre-mounted with premium tee-nuts. See LedgeWall Plus panels for mounting on concrete walls.
